JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Vol. 367 Nos. 1 and 2 4 APRIL 1994

Regular papers

Potential-step transient response of an electrochemical system
D.V. Matyushov (Kiev, Ukraine) 1

The effect of process parameters on the anodic dissolution of copper into NaCl/KSCN electrolytes
Z.H. Gu, J. Chen, T.Z. Fahidy (Canada) and A. Olivier (Reims, France) 7

Impedance spectroscopy of lithium electrodes. Part 2. The behaviour in propylene carbonate solutions – The significance of the data obtained
D. Aurbach and A. Zaban (Ramat Gan, Israel) 15

Study of the Schottky barrier and determination of the energetic positions of band edges at the n- and p-type gallium indium phosphide electrode|electrolyte interface
S.S. Kocha (Honolulu, HI, USA), J.A. Turner and A.J. Nozik (Golden, CO, USA) 27

A new type of piezoelectric detector in liquid. III. Computation of equivalent circuit parameters of a piezoelectric crystal with separated electrode and series piezoelectric sensors in electrolyte solution
D. Shen, L. Nie and S. Yao (Changsha, China) 31

Influence of thiourea on hydrogen evolution at a silver electrode as studied by electrochemical and SERS methods
J. Bukowska and K. Jackowska (Warsaw, Poland) 41

Electrical double layers on thiol-modified polycrystalline gold electrodes
J.A.M. Sondag-Huethorst and L.G.J. Fokkink (Eindhoven, The Netherlands) 49

Electrochemical study of pyrroloquinoline quinone covalently immobilized as a monolayer onto a cystamine-modified gold electrode
E. Katz, D.D. Schlereth and H.-L. Schmidt (Freising-Weihenstephan, Germany) 59

Characterization of electrodeposited copolymers of aniline and metanilic acid
J.Y. Lee, X.H. Su and C.Q. Cui (Singapore) 71

Electrochemistry of cytochrome c_3 at a lipid-modified graphite electrode
P. Bianco and J. Haladjian (Marseille, France) 79

Electrodeposition study on ultramicroelectrodes. Part 1. Influence of the substrate surface state in Ag crystallization
M.J. Peña, R. Celdran and R. Duo (Madrid, Spain) 85

A simplified set-up for electrochemical mass spectrometry and the use of a gold substrate for the investigation of porous electrode materials
E. Skou and J. Munk (Odense, Denmark) 93

Electroanalytical study of copper and iron compounds in the solid state: application to copper ferrite characterization
P. Encinas Bachiller, M.L. Tascon Garcia, M.D. Vazquez Barbado and P. Sanchez-Batanero (Valladolid, Spain) 99

Laser trapping and electrochemistry of a single oil droplet in water: electron transfer across the oil-droplet|electrode interface
K. Nakatani, T. Uchida, H. Misawa, N. Kitamura and H. Masuhara (Sakyo-ku, Japan) 109

Electroanalysis of metal species at polypyrrole-modified electrodes
K.-K. Shiu, S.-K. Pang and H.-K. Cheung (Kowloon, Hong Kong) 115

Microelectrode investigation of ultrahigh-rate lithium deposition and stripping
M.W. Verbrugge and B.J. Koch (Warren, MI, USA) 123

Phosphate and fluoride error of pH glass electrodes. Erroneous potentials caused by a component of some membrane glasses
F.G.K. Baucke (Mainz, Germany) 131

Mechanism of peroxodisulfate reduction at a polycrystalline gold electrode
Z. Samec and K. Doblhofer (Berlin, Germany) 141

Reduction mechanism of 3-hydroxy-4-hydroxyiminomethyl-5-hydroxymethyl-1,2-dimethylpyridinium iodide in an acidic medium
B. Raspor, J. Vorkapić-Furač and K. Berkovic (Zagreb, Croatia) 149

Influence of the supporting electrolyte on the oxygen reduction reaction at the platinum/proton exchange membrane interface
J.B. Floriano, E.A. Ticianelli and E.R. Gonzalez (São Carlos, Brazil) 157

Electrochemical reduction of carbon dioxide on hydrogen-storing materials. Part 3. The effect of the absorption of hydrogen on the palladium electrodes modified with copper
K. Ohkawa, Y. Noguchi, S. Nakayama, K. Hashimoto and A. Fujishima (Tokyo, Japan) 165

The electrochemical reduction of halothane. III: Chronoamperometric measurement of halothane and oxygen concentrations at a silver electrode
A.R. Mount (Edinburgh, UK) and D. Clark (Liverpool, UK) 175

Lithium-mediated electrochemical reduction of high pressure N_2 to NH_3
A. Tsuneto, A. Kudo and T. Sakata (Yokohama, Japan) 183

Electron transfer reaction of poly(ethylene oxide)-modified myoglobin coated on an ITO electrode in poly(ethylene oxide) oligomers
H. Ohno and T. Tsukuda (Tokyo, Japan) 189

The antimony/klebelsbergite electrode
M. Bojinov and D. Pavlov (Sofia, Bulgaria) 195

Effect of polyaniline on oxygen reduction in buffered neutral solution
C.Q. Cui and J.Y. Lee (Singapore) 205

Determination of NiS, NiSe and PdS formation orders during electroreduction of thiocyanate, selenocyanate and thiourea complexes of Ni(II) and Pd(II) at mercury electrodes
T.J. Hrynaszkiewicz, J. Kozłowski, E. Cieszyńska and T. Krogulec (Białystok, Poland) 213

Relation between surface enhanced Raman intensity and surface concentration for 2-amino 5-nitro pyridine adsorbed on roughened polycrystalline silver electrodes
M.L. Foresti (Florence, Italy), A.M. Funtikov (Moscow, Russian Federation), R. Guidelli and M. Muniz-Miranda (Florence, Italy) . . . 223

Electrochemical investigation of cetylpyridinium cation micelle adsorption at the Hg|aqueous solution interface
P. Nikitas, A. Pappa-Louisi and S. Antoniou (Thessaloniki, Greece) 239

Short communication

Cathodic stripping voltammetry for the detection of copper with thiocyanate ion in acidic solution
K. Yokoi, M. Todo and T. Koide (Kashiwara, Japan) 247

Preliminary notes

The use of fast frame video for the study of bubble growth
M.W. Carr, L.A. Harris, A.R. Hillman (Leicester, UK), S.D. Lubetkin (Wantage, UK) and J. Satherley (Liverpool, UK) 251

In-situ photoelectrochemical microscopic study of $Pb/PbO/PbSO_4$ multi-interface system
Y. Yang, X.G. Chen, X.D. Zhuo and Z.G. Lin (Fujian, China) 255

Nanoscale structural changes upon electro-oxidation of Au(111) as probed by potentiodynamic scanning tunneling microscopy
X. Gao and M.J. Weaver (West Lafayette, IN, U.S.A.) 259

Electrochemical properties of carbon based interdigitated microarray electrodes fabricated by the pyrolysis of electrochemically prepared conducting films
O. Niwa, T. Horiuchi and H. Tabei (Tokai, Japan) 265

Increase of the redox current in cyclic voltammetry of a compound dissolved in Nujol by contacting with a surface active compound in an aqueous solution
O.-S. Kim, S. Shiragami and K. Kusuda (Osaka, Japan) 271

Oxidation of NADH by oxometalates
K. Essaadi, B. Keita, L. Nadjo (Orsay, France) and R. Contant (Paris, France) 275

Electrochemical impedance spectroscopy at an ultramicroelectrode
P.G. Bruce, A. Lisowska-Oleksiak, P. Los and C.A. Vincent (Fife, Scotland) 279

Chemically-modified electrodes based on new metal-dibenzotetraaza [14] annulenes
B. Keita, Y.W. Lu and L. Nadjo (ORSAY, France) 285

Ac electrochemical-thermal method for investigating hydrogen adsorption and evolution on a platinised platinum electrode
Z. Jiang, W. Zhang and X. Huang (Shanghai, China) 293

Sonoelectrochemistry: Effects of ultrasound on voltammetric measurements at a solid electrode
J. Klíma, C. Bernard and C. Degrand (Aubiere, France) 297
